

numjobs

Outstanding achievements in the engineering industry have something in common: they always result from superior performance, exceptional technology and a high degree of creativity. In that way NUM has built up an outstanding reputation in the tool and machinery industry. We develop complex, customized CNC automation solutions that guarantee the machine manufacturers as well as users with a high degree of added value.

NUM's successes are achieved essentially through the know-how and personal commitment of our employees.

IT Manager NUM Group (CIO)

NUM INDUSTRY ALLIANCE AG (NIA) is the holding company of all NUM entities worldwide. NIA provides IT services to the eleven NUM locations with 280 employees all over the world and is located in Teufen, Switzerland.

As IT Manager NUM Group (CIO) your responsibility is to:

- Develop, maintain and control the information technology strategy, the security manual/policy and the operational manual for the NUM Group
- Operatively play a role in the NUM global IT team
- Identifying and mitigating technology risks, including cybersecurity threats and data breaches
- Ensuring that IT operations comply with industry regulations, and legal requirements
- Evaluating and selecting third-party vendors for IT services, hardware, or software, and managing those relationships
- Overseeing the organization's hardware, software, networks, and data centers to ensure efficiency and security
- Manage the NUM Group IT project portfolio
- Developing and managing the IT budget, ensuring cost-effective spending, and allocating resources efficiently
- Manage, recruit and train the local IT team
- Report directly to our Group CEO/CFO

Abilities:

You hold a degree in systems engineering or business informatics with several years of related experience in the field of information technology and project management. Your language skills in English are excellent, a good German level is welcome. Your technical skills and your fast thinking mind allows you to face the challenges of operating a group IT landscape together with your team of four employees.

We are looking for an experienced, team oriented, motivated and committed IT technician. You are a dynamic open minded person, capable to go deep in the projects and being operational beside your team, and also keep the overview in a high pressure and fast paced environment.

Our advantages:

A technical very exciting, varied area of responsibility with a high degree of autonomy and a great deal of freedom in carrying out daily tasks. In addition to flexible working hours and progressive employment conditions, you will also benefit from the support of a motivated team with a sound technical background. We cultivate a healthy culture throughout the company and enjoy a collegial and informal atmosphere.

Place of Work: Teufen, Switzerland or Cuggiono, Italy
